Installation Guide

Digital Toolbox for Windows 10 / 11 · about 5 minutes · by Digital Arts

Download the setup, open it, and if Windows shows a **blue "Windows protected your PC"** screen click **More info → Run anyway**. This screen is normal for new software and installing this way does not harm your computer.

What you need

Item	Requirement
Computer	Windows 10 or Windows 11 (64-bit)
Free space	About 400 MB (the download is about 90 MB)
Internet	For the first start and the free trial / licence; daily work runs without internet
Download	**apps.datpl.com/toolbox** → **Download for Windows**

Install in 6 steps

1. **Download.** Open **apps.datpl.com/toolbox** and click **Download for Windows**. The file **Digital-Toolbox-Setup.exe** goes to your **Downloads** folder.
   If Chrome or Edge says the file "isn't commonly downloaded", click **Keep** (in Edge: **...** → **Keep** → **Keep anyway**).
2. **Open the setup.** Double-click **Digital-Toolbox-Setup.exe**.
3. **Blue screen? Click "More info", then "Run anyway".** See the pictures on the next page.
4. **Allow changes.** If Windows asks *"Do you want to allow this app to make changes to your device?"*, click **Yes**.
5. **Setup.** Click **Next**, keep the folder as it is, then **Install**. It takes 1–2 minutes.
6. **Finish.** Keep **Run Digital Toolbox** ticked and click **Finish**. A red **Digital Toolbox** icon is now on your desktop.

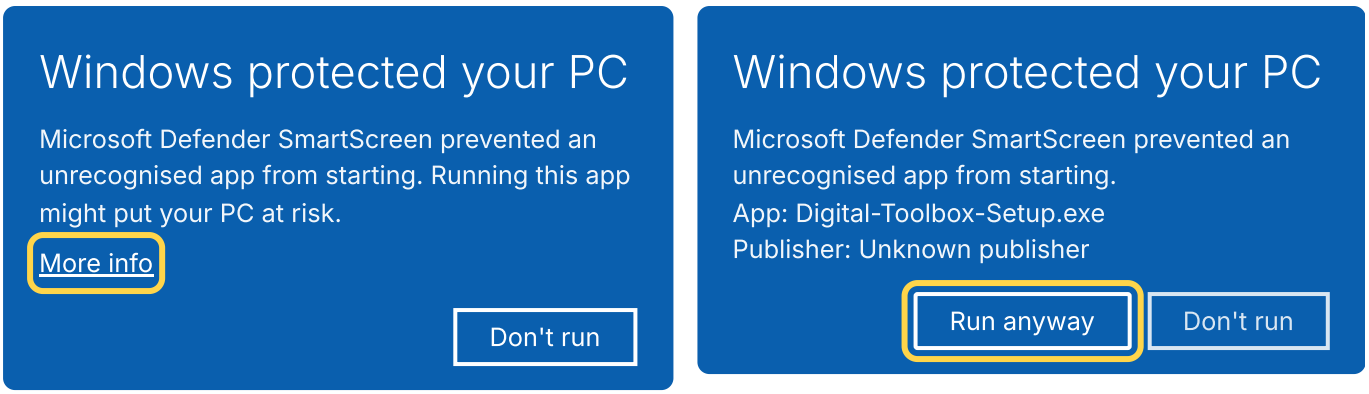

> **Updates are automatic.** When a new version comes out, the app updates itself — you never need to download it again.

The blue screen: "Windows protected your PC"

Windows (Microsoft Defender SmartScreen) shows this for any new program that only a few people have downloaded so far. It is a general caution, not a virus warning. Do this:

1 · Click "More info"

2 · Click "Run anyway"

Simplified drawing of the Windows screen. The **Run anyway** button appears only after you click **More info**.

Is it safe? Yes. Installing with **Run anyway** does not harm your computer.

- The warning appears because the software is new, not because something was found in it. As more people install it, Windows learns it and stops showing the screen.
- Digital Toolbox is made by **Digital Arts** (Andaman & Nicobar Islands). It has no virus, no ads and no spyware.
- It installs only its own files and does not change Windows settings or other programs. Remove it any time from **Settings** → **Apps**.
- "Unknown publisher" only means the file is not yet signed with a paid certificate.

Only for the real file. Use **Run anyway** only for the setup downloaded from **apps.datpl.com/toolbox** or sent to you directly by Digital Arts — never for a copy from an unknown website or forwarded by someone else.

If Windows Security (antivirus) blocks or deletes the setup

Sometimes Microsoft Defender removes a new setup file by mistake (a "false positive"). Get it back and allow it like this:

1. Open **Start** → type **Windows Security** → open it → **Virus & threat protection**.
2. Click **Protection history**. Open the newest item that names **Digital-Toolbox-Setup.exe** (or `Digital Toolbox`).
3. Click **Actions** → **Allow on device** (or **Restore**). Then open the setup again.

Stop it happening again: add an exclusion (optional)

1. In **Windows Security** → **Virus & threat protection**, under *Virus & threat protection settings* click **Manage settings**.
2. Scroll to **Exclusions** → **Add or remove exclusions** → **Yes**.
3. Click **+ Add an exclusion** → **Folder**, and choose the Digital Toolbox folder. To find it: right-click the **Digital Toolbox** desktop icon → **Open file location** (usually `C:\Users\<your name>\AppData\Local\Programs\…`).

Exclude only the Digital Toolbox folder — never your whole C: drive or Downloads folder.

Other antivirus (Quick Heal, K7, Avast, Norton ...): open the antivirus → **Quarantine** / **Virus vault** → select **Digital-Toolbox-Setup.exe** → **Restore** and **Add to exclusions / Trust**.

First start

1. The app opens with **Try every tool FREE for 15 days**.
2. Type your name, 10-digit mobile (WhatsApp) number and shop name, then click **Start 15-day free trial**. No payment or card is needed.
3. Every tool works for 15 days. After that the Free version keeps working, or buy a licence at **apps.datpl.com/buy** or from **Licence** → **Buy licence** in the app.
4. Bought a licence? Click **Enter licence key** and type the key (for example `DPR-XXXX-XXXX-XXXX-XXXX`).

One licence key works on one computer. Changing your computer? Send us your key on WhatsApp and we will move it.

Problems and fixes

Problem	What to do
No “Run anyway” button on the blue screen	Click **More info** first; the button appears after that.
Setup disappeared after download	Your antivirus removed it — see “If Windows Security blocks or deletes the setup”.
Browser blocked the download	In the browser's Downloads list click **Keep** / **Keep anyway**.
“This app can't run on your PC”	The computer is 32-bit or older than Windows 10. Digital Toolbox needs 64-bit Windows 10 / 11.
Free trial does not start	Check the internet and that the mobile number has 10 digits; then try again.
“Licence is already used on another PC”	Send the key on WhatsApp; we reset it for the new computer.
Remove the software	**Settings** → **Apps** → **Installed apps** → **Digital Toolbox** → **Uninstall**.

Need help? WhatsApp **9933211177** (Digital Arts) — send a screenshot of the screen and we will help right away.
